Data Analyst Intern

DAY 7

TASK

1. Weekly Progress Review

1. What I learned this week

This week, I learned the basics of data analytics for a fashion e-commerce business like Raritone. I understood how data helps businesses track user behavior, measure performance, improve conversions, and increase customer retention.

I learned how to create sample datasets, build dashboards, calculate KPIs, analyze user engagement, study conversion funnels, and compare competitor strategies.

2. Tools explored

- Google Sheets -Creating datasets, formulas, charts, dashboards
- Power BI – For understanding dashboard and visualization concepts
- Google Analytics - Learning users, sessions, bounce rate, traffic sources, conversions
- Notion - Writing reports and research notes

3. Analytics concepts understood

- KPI - Key metric used to measure business performance
- User Engagement - How users interact with the website/app
- Retention Rate - Percentage of users who return
- Conversion Rate - Percentage of users who complete a goal
- Funnel Analysis - Tracking user journey from visit to purchase
- Bounce Rate - Users leaving without deeper interaction
- Traffic Source - Where users come from
- Cart Abandonment - Users adding products to cart but not buying

4. Challenges faced

- Understanding new analytics terms like retention, conversion, and funnel drop-off
- Creating dashboards in Google Sheets
- Choosing the correct KPIs for fashion e-commerce
- Understanding competitor strategies
- Organizing data into a professional report
- Formatting charts and tables properly

5. Skills improved

- Data entry - Learned to create clean sample datasets
- Dashboard creation - Learned KPI cards and charts
- Data analysis - Learned to identify trends and drop-offs
- Reporting - Learned to write weekly insights
- Competitor research - Learned to compare fashion apps

2. Weekly Analytics Report

1. Understanding of Raritone Business Model

Raritone is a **fashion-tech company** that focuses on improving the online clothes shopping experience through **virtual try-on technology**. The platform helps users digitally try clothes before purchasing, which can reduce size confusion, improve product confidence, and support better purchase decisions.

Raritone's business model combines **fashion e-commerce analytics** and **technology-based shopping experience**. Users can discover clothes, view product details, use virtual try-on features, add products to cart, complete purchases, and return for repeat shopping.

The main goal of Raritone is to make online fashion shopping more interactive, personalized, and reliable by helping users visualize how clothes may look before buying.

Raritone's main business goals

- Increase website/app visitors
- Improve virtual try-on usage
- Increase product views
- Increase add-to-cart actions
- Improve purchase conversion rate
- Reduce cart abandonment

- Reduce size and fit confusion
- Improve customer confidence before purchase
- Increase user retention

2. User Journey Analysis

Process:

Awareness → Visit Website/App → Browse Products → View Product Details → Add to Cart → Checkout → Purchase → Return/Repeat Purchase

- Awareness - User discovers Raritone
Ex: Instagram ad, Google search
- Visit - User opens website/app
Ex: User visits homepage
- Browse - User explores categories
Dresses, kurtis, shoes
- Product View - User checks product details
Ex: Price, size, images
- Add to Cart - User shows purchase intent
Ex: Adds kurti to cart
- Checkout - User enters address/payment
Ex: Starts payment process
- Purchase - User completes order
Ex: Order placed
- Retention - User comes back again
Ex: Repeat purchase

3. Fashion E-commerce Insights

Fashion e-commerce depends heavily on:

- Product images
- Size guides
- Product descriptions
- Reviews and ratings
- Discounts and offers
- Easy return policy
- Delivery speed

Users may like a product visually, but they may not purchase if they are unsure about size, quality, delivery charges, return policy, or price.

4. Competitor Analysis

Comparing:

- Myntra
- AJIO
- Amazon Fashion

Competitor Comparison

Competitor	User Experience	Recommendation Systems	Marketing Strategies	Engagement Features
Myntra	Easy navigation, strong category filters, fashion-focused app experience	Personalized product suggestions, wishlist-based recommendations	Big sales, influencer marketing, app notifications, brand campaigns	Wishlist, order tracking, sale alerts, personalized feeds
AJIO	Trendy fashion layout, discount-focused browsing, ethnic and western collections	Category-based and browsing-based suggestions	Heavy discounts, seasonal offers, Reliance brand trust	Wishlist, offers, filters, cart reminders
Amazon Fashion	Familiar Amazon shopping experience, fast search, strong delivery trust	Search-based, purchase-history-based, and similar product recommendations	Prime offers, festival sales, discounts, fast delivery promotions	Reviews, ratings, recommendations, delivery tracking

6. Social Media Engagement Observations

Social media is important for fashion e-commerce because users often discover fashion products through platforms like Instagram, YouTube, Facebook, and influencer content.

Social media metrics are

- Reach - Number of people who saw the content
- Impressions - Number of times content was displayed

- Likes - Shows interest
- Comments - Shows interaction
- Shares - Shows content popularity
- Clicks - Shows traffic sent to website/app
- CTR - Percentage of users who clicked after seeing content

For Raritone, social media can help increase awareness, website traffic, product discovery, and conversions. Instagram and influencer campaigns can be useful for promoting new arrivals, offers, and trending fashion collections.

3. KPI Dashboard Task

User Growth

Engagement Rate

5. User Behavior Analysis

1. Why users abandon carts

Users abandon carts because of

- High delivery charges
- Complicated checkout process
- Lack of payment options
- No cash on delivery
- Price comparison with competitors
- Size confusion
- Product quality doubts
- Long delivery time
- No discount
- Trust issues

2. Why users engage with fashion apps

Users engage with fashion apps because of

- New arrivals
- Offers and discounts
- Personalized recommendations
- Wishlist
- Product images
- Trendy collections
- Influencer promotions
- Easy search and filters
- Reviews and ratings

3. What features increase retention

Features that increase retention by

- Wishlist reminders
- Loyalty points
- Personalized recommendations
- Easy returns
- Fast delivery
- Cart recovery notifications
- Order tracking
- Better customer support
- App notifications for offers

4. How AI recommendations improve shopping

AI recommendations improve shopping by

- Showing products based on user interest
- Suggesting similar products
- Recommending frequently bought items
- Helping users discover relevant products faster
- Increasing add-to-cart and purchase chances

Ex: If a user views kurtis often, AI can recommend similar kurtis, matching leggings, dupattas, or accessories.

PRESENTATION

Raritone

Week 1 Analytics Review —Raritone

Data Analyst Intern Presentation
CH.Siddhi
siddhic431@gmail.com

Week 1 Learnings

- Learned basics of fashion e-commerce analytics
- Explored Google Sheets, Excel, Power BI, and Google Analytics
- Understood KPIs, engagement, retention, and conversion funnel
- Created sample dashboards and weekly reports
- Studied competitor strategies

Raritone Business Understanding

- Raritone is considered a fashion e-commerce brand
- Business depends on product discovery, engagement, conversion, and retention
- Analytics helps understand user behavior and improve sales
- Important goals include increasing purchases, reducing cart abandonment, and improving repeat users

KPI Dashboard Overview

1

Tracked user growth, engagement rate, retention rate, purchases, and social media reach

2

Used Google Sheets to create KPI cards and charts

3

Dashboard helps identify weekly trends

4

Metrics show user activity and business performance

Metrics show user activity and business performance

Awareness → Visit → Product View → Add to Cart → Checkout → Purchase → Retention

- Users discover products through social media and search
- Biggest drop-off usually happens between product view and add-to-cart
- Clear product information and offers can improve conversions

Competitor Insights

	Competitor	Key Strategy
1	Myntra	Personalization, wishlist, sales, fashion-focused UX
2	AJIO	Discounts, seasonal offers, trendy collections
3	Amazon Fashion	Trust, reviews, fast delivery, recommendations

Suggestions for Raritone

- Improve product images and descriptions
- Add size charts and customer reviews
- Use wishlist reminders and cart recovery
- Offer first-order discounts
- Improve checkout and payment options
- Track KPIs weekly

Conclusion

- Week 1 helped build a strong foundation in analytics
- Dashboards help convert raw data into insights
- Competitor research helps identify improvement areas
- Raritone can improve conversions and retention using data-driven decisions
