DAY 10

TASK

1. Marketing Analytics Research

Sheet 1 — Marketing KPIs

Marketing KPI	Meaning	Why It Matters for Raritone
Reach	Number of people who saw the ad/reel/post	Shows how many people discovered Raritone
Engagement Rate	Likes, comments, shares, saves, and clicks compared to reach	Shows how interesting the content is
Click Through Rate	Percentage of users who clicked from ad/reel to website/app	Shows how many users moved from social media to Raritone
Customer Acquisition Cost	Cost spent to acquire one new user/customer	Helps understand marketing cost efficiency
Return on Investment	Revenue earned compared to marketing spend	Shows whether campaigns are profitable
Reel Views	Number of views received by Instagram reels	Helps measure short-video performance
Influencer Conversion Rate	Users who purchased or signed up from influencer campaigns	Shows influencer marketing impact
App Download Rate	Percentage of users who downloaded app after seeing campaign	Measures app growth from marketing
Signup Conversion Rate	Percentage of visitors who created accounts	Shows onboarding effectiveness
Try-On Usage Rate	Percentage of users who used virtual try-on after signup	Measures Raritone's core feature adoption

5 Important Marketing KPIs

No.	KPI	Explanation
1	Engagement Rate	Measures how users interact with posts, reels, and ads through likes, comments, shares, saves, and clicks
2	Click Through Rate	Shows how many users clicked from Instagram/ad content to Raritone website or app
3	Customer Acquisition Cost	Shows how much money is spent to acquire one new user or customer
4	Return on Investment	Measures whether marketing campaigns generate profit compared to campaign cost
5	Try-On Usage Rate	Shows how many acquired users actually use Raritone's virtual try-on feature

3 Strategies to Improve Raritone Growth

No.	Growth Strategy	Why It Helps
1	Promote virtual try-on through Instagram reels and influencer videos	Users can visually understand Raritone's unique feature and become curious to try it
2	Use targeted ads for Gen Z and fashion-interested users	Helps reach users who are more likely to engage with fashion-tech shopping
3	Create referral and first-try-on campaigns	Encourages users to invite friends and use virtual try-on for the first time

2. Social Media Performance Analysis

Sheet 2 — Social Media Comparison

Brand	Engagement Patterns	Posting Frequency	Reel Performance	Viral Content Style	Audience Interaction	Insight for Raritone
Myntra	High engagement during sales, festive campaigns, celebrity/influencer posts	Frequent posts and reels during campaigns	Reels perform well when focused on trends, styling, and offers	Trend-based fashion, celebrity looks, sale announcements	Comments, likes, shares, wishlist interest	Raritone can use trend-based reels and virtual try-on demos
Nykaa Fashion	Engagement improves with premium brands, curated collections, and influencer styling	Regular fashion edits and campaign posts	Reels work well for styling tips and new arrivals	Premium fashion, beauty-fashion combinations, curated looks	Users interact with product recommendations and offers	Raritone can create curated try-on collections
Zara	Strong engagement through minimal, aesthetic, high-fashion visuals	Posts are less frequent but visually strong	Reels/images focus on premium styling and brand identity	Clean visuals, seasonal collections, lifestyle fashion	Audience engages with aspirational fashion content	Raritone can improve visual branding and product presentation
H&M	High engagement with affordable fashion, trends, sustainability, and seasonal collections	Frequent global campaign posts	Reels perform well with outfit ideas and casual styling	Trendy, youthful, affordable, lifestyle-based content	Strong interaction on new launches and collaborations	Raritone can use affordable styling ideas and Gen Z-focused campaigns

Social Media Research Summary

Fashion brands use social media to increase awareness, engagement, website visits, and purchases. Reels, influencer content, styling videos, festive campaigns, and sale announcements usually perform well because fashion is highly visual. For Raritone, social media should focus on showing how virtual try-on works, how users can try clothes digitally, and how this feature reduces size and style confusion.

3. User Acquisition Funnel

H12

	A	B	C	D	E
1	Funnel Stage	Users	Drop-off Users	Conversion Rate	
2	Instagram Ad/Reel	50000	0	100%	
3	Website Visit	12000	38000	24.00%	
4	App Download	6000	6000	12.00%	
5	Account Signup	4200	1800	8.40%	
6	Virtual Try-On Usage	2500	1700	5.00%	
7	Purchase	900	1600	1.80%	
8					

Funnel Analysis Notes

Observation	Insight	Improvement Opportunity
Large drop-off from Instagram Reach to Website Visit	Many users see the ad/reel but do not click	Improve call-to-action, use stronger captions, and show virtual try-on clearly
Drop-off from Website Visit to App Download	Some users visit but do not install the app	Add app download benefits, first-time offer, and try-on demo
Drop-off from Signup to Virtual Try-On	Users sign up but may not understand the try-on feature	Add onboarding tutorial and visible Try-On button
Drop-off from Virtual Try-On to Purchase	Users try clothes but may still hesitate to buy	Add size confidence, reviews, offers, and easy return policy

The stage that needs the most improvement is Signup to Virtual Try-On Usage. Since virtual try-on is Raritone’s main feature, users should be guided to try clothes digitally

immediately after signup. Improving onboarding, Try-On button visibility, and try-on tutorials can increase engagement and purchase conversion.

5. Customer Persona Analysis

Sheet 5 — Customer Persona

Persona Name	Age Group	Shopping Habits	Interests	Pain Points	Fashion Preferences	Online Behavior	Rarity Opportunity
Trendy Gen Z Shopper	18–24	Browses often, follows trends, saves wishlist items	Instagram reels, influencers, college fashion, discounts	Unsure about fit, wants affordable styles, compares prices	Streetwear, casual wear, western wear, trendy outfits	Active on Instagram, watches reels, clicks fashion ads	Promote try-on reels, trend-based collections, student offers
Occasion Wear Buyer	22–30	Shops before events, festivals, parties, weddings	Ethnic wear, party wear, styling ideas	Confused about look, size, and styling combinations	Dresses, kurtis, sarees, festive wear	Searches on Google/Instagram, checks reviews before buying	Use virtual try-on, styling recommendations, complete-the-look suggestions
Practical Repeat Shopper	25–35	Buys useful clothes regularly, values comfort and trust	Office wear, daily wear, quality, easy returns	Worries about product quality, return process, and delivery time	Comfortable ethnic wear, casual wear, workwear	Reads reviews, compares options, prefers smooth checkout	Highlight reviews, return policy, personalized recommendations

Persona	Engagement Score
Trendy Gen Z Shopper	90
Occasion Wear Buyer	80
Practical Repeat Shopper	70

7. Daily Summary

Today, I completed the Day 10 Data Analyst Intern task for Raritone. I researched marketing analytics for fashion-tech companies and identified important KPIs such as engagement rate, click-through rate, customer acquisition cost, return on investment, and try-on usage rate.

I analyzed social media strategies of Myntra, Nykaa Fashion, Zara, and H&M, focusing on engagement patterns, posting frequency, reel performance, viral content style, and audience interaction. I also created a user acquisition funnel for Raritone from Instagram Ad/Reel to Purchase and identified key drop-off stages.

I updated the growth dashboard with marketing performance data, campaign metrics, growth charts, conversion graphs, and engagement comparisons. I also created three customer personas for Raritone based on age group, shopping habits, interests, pain points, fashion preferences, and online behavior.

Overall, Day 10 helped me understand how marketing analytics, social media performance, user acquisition funnels, and customer personas can support app growth and engagement for a fashion-tech company like Raritone.
