Day 1 Retention	58%
Week 1 Retention	43%
Repeat Users	3,200
Loyalty Users	1,100

Virtual Try-On Usage Metrics

KPI	Value
Try-On Users	4,200
Avg Try-Ons per User	5
Try-On to Cart Rate	42%
Try-On to Purchase Rate	21%

Conversion Funnel

Stage	Users
App Visit	10,000
Product View	8,000
Virtual Try-On	4,200
Add to Cart	2,000
Checkout	1,300
Purchase	850

Dashboard Charts

Chart 1 - Virtual Try-On Usage Trend

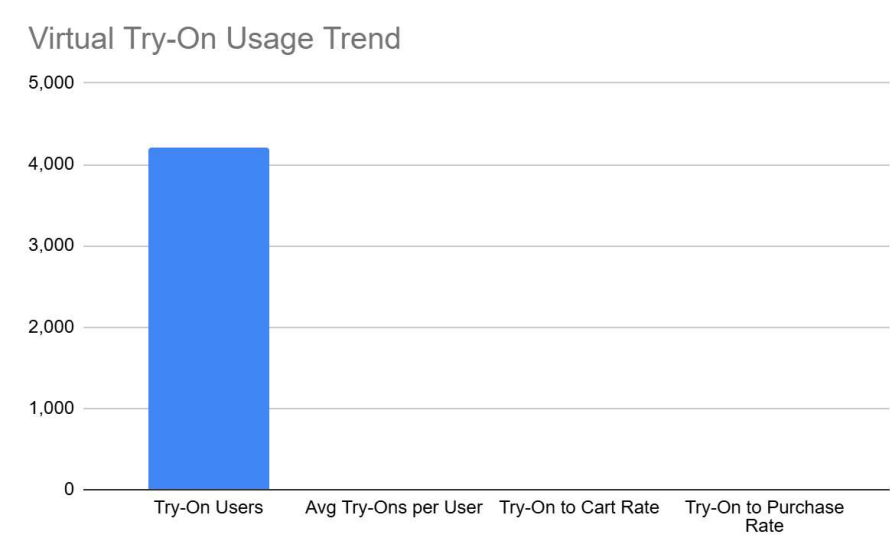

Chart 2 - Conversion Funnel

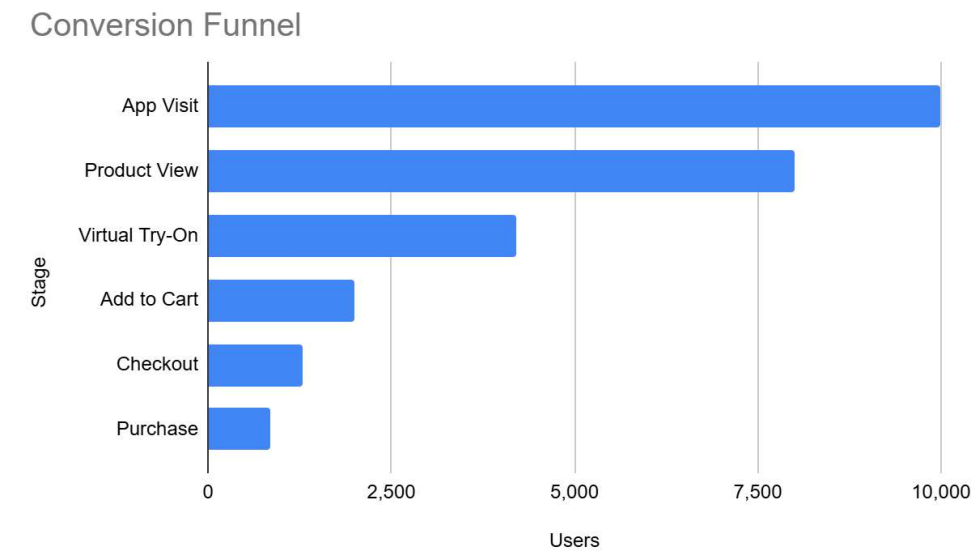

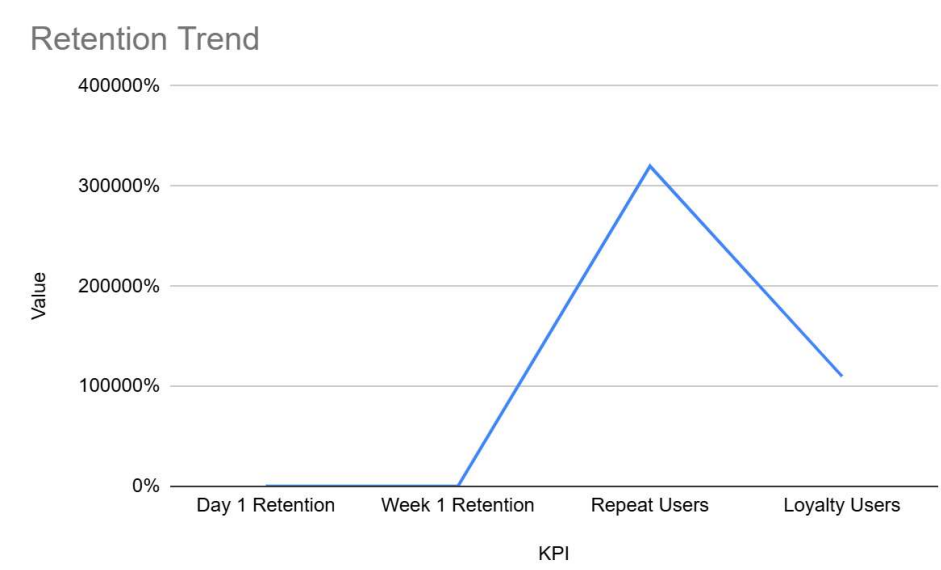

Chart 3 - Retention Trend

4. Business Recommendations

5 Recommendations for Raritone

No	Recommendation	Expected Benefit
1	Improve AI-based outfit recommendations	Better personalization
2	Promote virtual try-on on every product page	Higher engagement
3	Send wishlist and cart reminders	Improved retention
4	Add AI styling suggestions after try-on	More product discovery
5	Create loyalty rewards for frequent users	Increased repeat purchases

Virtual try-on should remain the center of the Raritone experience. Combining AI recommendations, personalized notifications, loyalty rewards, and styling assistance can significantly improve engagement, retention, and conversion rates.

5. Daily Summary

Today I analyzed how virtual try-on affects purchase decisions and studied the benefits of AR/VR shopping experiences. I researched user engagement factors, customer retention factors, and shopping behavior patterns relevant to Raritone.

I also analyzed virtual try-on competitors and fashion e-commerce platforms to identify successful engagement and recommendation strategies. Based on the findings, I created dashboard metrics covering user engagement, retention, virtual try-on usage, and conversion funnel performance.

Finally, I developed business recommendations focused on AI personalization, virtual try-on adoption, customer retention, and conversion optimization. This task improved my understanding of how virtual try-on analytics and customer intelligence can drive growth for a fashion-tech company like Raritone.
