Purchase	950

Charts

Chart 1: User Engagement Metrics

Chart 2: Try-On Usage Analytics

Chart 3: Retention Metrics

Chart 4: Conversion Funnel

4. Recommendations

5 Data-Driven Recommendations

No	Recommendation	Expected Benefit
1	Highlight virtual try-on on every product page	Increase try-on adoption
2	Add AI outfit recommendations after try-on	More product discovery
3	Send wishlist and cart reminders	Better retention
4	Create loyalty rewards for repeat users	More repeat purchases
5	Use personalized notifications based on user behavior	Higher engagement

Recommendation Summary

Raritone should focus on increasing virtual try-on adoption because users who use try-on features show higher engagement and purchase intent. AI-powered recommendations, personalized notifications, loyalty rewards, and improved product discovery can significantly improve retention and conversions. Combining customer intelligence with virtual try-on analytics will help create a more personalized shopping experience and strengthen Raritone's competitive advantage in fashion technology.
