Data Analyst Interns

Day 2

Tasks

1. Setup Required Platforms

I have created accounts these tools.

A. Google Sheets

B. Microsoft Excel

C. Power BI

D. Notion

2. Create Sample Analytics Dashboard

a **simple dashboard using dummy data.**

The dashboard should include:

- Total users
- New users
- Daily engagement
- Most viewed products
- App traffic source

In Google Sheets.

Raw Data

Date	Total Users	New Users	Daily Engagement	Most Viewed Product	Product Views	Traffic Source
01-May	1200	250	680	Kurti	420	Instagram
02-May	1350	300	750	Saree	390	Google Search
03-May	1500	320	820	Jeans	450	Direct
04-May	1420	280	790	Dress	510	Facebook
05-May	1600	350	900	Kurti	530	Instagram
06-May	1750	400	980	Handbag	470	Google Search
07-May	1900	420	1050	Shoes	560	Direct

Created KPI Cards

KPI 1: Total Users

Formula:

=SUM(B2:B8)

KPI 2: New Users

Formula:

=SUM(C2:C8)

KPI 3: Total Daily Engagement

Formula:

=SUM(D2:D8)

KPI	Value
Total Users	10,720
New Users	2,320
Daily Engagement	5,970

Charts

Chart 1: Daily Engagement Trend

Daily Engagement Trend

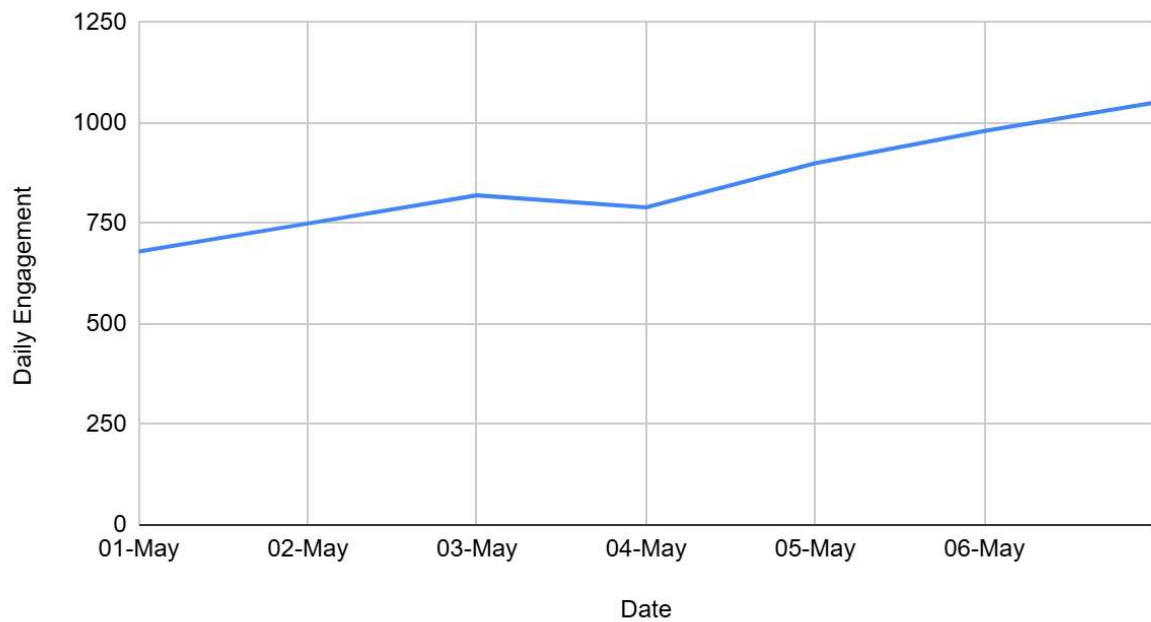

Chart 2: Most Viewed Products

Most Viewed Products

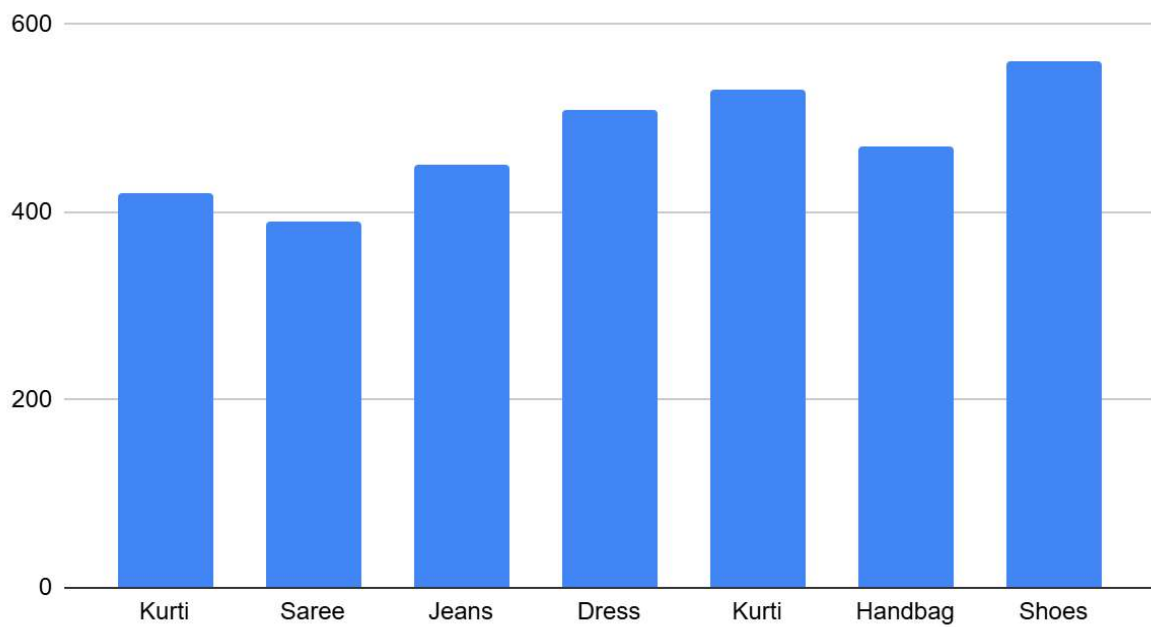

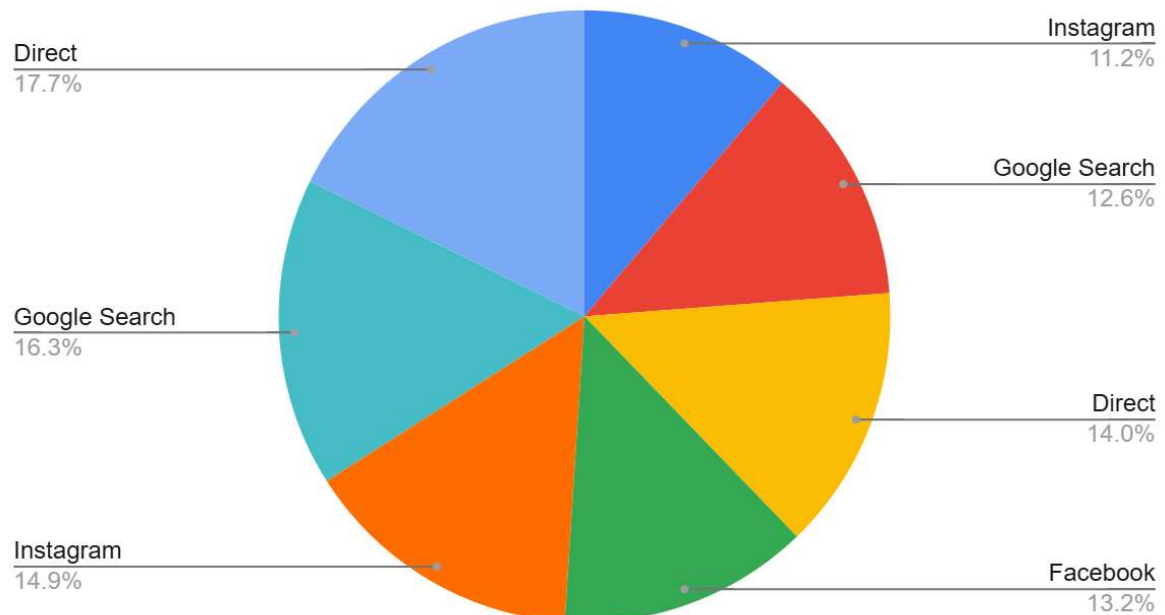

Chart 3: App Traffic Source

App Traffic Source

Dashboard Layout

Dashboard

Total Users	New Users	Daily Engagement
10,720	2,320	5,970

Competitor Analysis Summary

You can use this as your submission.

1. Myntra

Myntra is one of India's popular fashion shopping platforms. It offers clothing, footwear, beauty, personal care, accessories, and home products. The Myntra app is described as a one-stop lifestyle shopping app with a wide variety of fashion and beauty products. Some reviews appreciate its large collection, easy navigation, product categories, and shopping experience. However, negative reviews mention customer service issues, product quality concerns, order problems, and return-related dissatisfaction.

Popular features

- Large fashion product collection

- Clothing, beauty, skincare, and home products
- Easy product browsing
- Wishlist and cart options
- Offers and sales
- Delivery tracking
- Return and exchange options

Common complaints

- Customer support issues
- Product quality mismatch
- Wrong or delayed orders
- Return/refund problems

2. AJIO

AJIO is an online fashion shopping platform by Reliance Retail. It offers ethnic wear, western wear, footwear, accessories, and lifestyle products. User reviews show that customers like the availability of fashion products and discounts, but many complaints are related to wrong products, delayed delivery, return pickup problems, refund issues, and poor customer support. Some review platforms report very low customer satisfaction scores for AJIO, especially around delivery and returns.

Popular features

- Wide fashion collection
- Ethnic and western wear
- Discounts and offers
- Wishlist and cart
- Product search and filters
- Online payment options

Common complaints

- Wrong products delivered
- Delayed delivery
- Return pickup issues
- Refund delays
- Poor customer support

3. Nykaa Fashion

Nykaa Fashion focuses on fashion, luxury, designer wear, accessories, kids' fashion, home decor, and lifestyle products. The Google Play listing describes it as a fashion app with collections from brands such as Label Ritu Kumar, AND, Global Desi, Alaya by Stage3, AM:PM, and Varun Bahl. Reviews show that users like the variety of fashion collections and brand options, but complaints include delayed delivery, return pickup problems, order cancellations, poor customer support, and replacement issues.

Popular features

- Designer and premium fashion collections
- Ethnic wear and western wear
- Kids' fashion
- Home decor and lifestyle products
- Offers and sale sections
- Easy checkout
- Multiple payment options

Common complaints

- Delayed delivery
- Return pickup problems
- Order cancellation
- Customer support issues
- Replacement delays

Competitor Comparison Table			
Competitor	Strengths	Common Complaints	What Raritone Can Learn
Myntra	Large product range, easy browsing, strong fashion brand image	Customer service, returns, product mismatch	Build a clean app with reliable support and accurate product details
AJIO	Discounts, ethnic and western collections, wide catalog	Wrong products, refund delays, return issues	Improve delivery accuracy and return/refund process
Nykaa Fashion	Premium brands, designer collections, fashion + lifestyle products	Delayed delivery, cancellations, return pickup issues	Focus on premium experience and transparent delivery updates

4. KPI Research Document

KPI Research Document: Raritone

1. Total Users

Total users means the number of users who visit or use Raritone's website/app.

This KPI helps Raritone understand its audience size and brand reach.

2. New Users

New users means the number of first-time visitors or first-time app users.

This KPI helps measure marketing performance and customer acquisition.

3. Daily Engagement

Daily engagement measures how actively users interact with the app or website.

It can include:

- Product views
- Add-to-cart actions
- Wishlist clicks
- Search activity
- Time spent on app

This KPI helps Raritone understand whether users are interested in the products.

4. Most Viewed Products

Most viewed products show which products receive the highest number of views.

This helps Raritone identify trending products and customer preferences.

For example, if kurtis and dresses are most viewed, Raritone can promote those categories more.
