Engagement Flow

The engagement flow shows how users interact with Raritone from visiting the website to completing purchases. Product views are higher than visitors because one user can view multiple products. The biggest drop-off is between Product Views and Add to Cart, which means users are browsing products but not adding enough items to cart.

Retention Analysis

KPI Data KPI Dashboard Engagement Flow Retention Analysis

User retention is important because returning users are more likely to purchase again and are cheaper to retain than acquiring new users. Raritone can improve retention by using personalized recommendations, wishlist reminders, loyalty rewards, better product details, smooth returns, and cart recovery messages.

Study Fashion E-commerce Conversion Strategies

Study Fashion E-commerce Conversion Strategies		
Conversion Strategy	Meaning	Example for Raritone
Clear Product Images	High-quality product photos help users trust the product	Show front, back, close-up, and model images
Size Guide	Helps users choose the correct size	Add size chart for every clothing category
Discounts and Offers	Encourages users to purchase	First-order discount or festival sale
Easy Checkout	Reduces friction during purchase	Fewer checkout steps and saved address option
Multiple Payment Options	Gives users payment flexibility	UPI, cards, net banking, wallets, COD
Free Delivery Threshold	Encourages higher order value	Free delivery above ₹999
Product Reviews	Builds trust through customer feedback	Show ratings and review photos

Weekly Report

Weekly Analytics Summary — Raritone

1. Overview

This weekly analytics summary explains Raritone’s KPI performance, user engagement flow, conversion strategies, retention techniques, and overall business insights. The report is created using sample weekly data for practice and dashboard building.

2. KPI Performance

Raritone recorded 17,350 website visitors during the week. The total revenue generated was ₹10,27,500. The purchase conversion rate was 11.84%, which shows the percentage of visitors who completed a purchase.

The retention rate was 72.06%, showing that many users returned to the platform. The average bounce rate was 38.14%, which means some users still left the website without deeper interaction.

3. User Engagement Flow

The user engagement flow shows that users move through the following stages:

Website Visitors → Product Views → Add to Cart → Checkout Started → Purchases

The biggest drop-off happened between Product Views and Add to Cart. This means users are browsing products but not adding enough products to cart.

4. Fashion E-commerce Conversion Strategies

For fashion e-commerce, conversion can be improved by using clear product images, size charts, product reviews, discounts, free delivery offers, easy checkout, and multiple payment options.

Raritone should focus on improving product pages and checkout experience to reduce drop-offs and increase purchases.

5. User Retention Techniques

User retention can be improved through personalized recommendations, wishlist reminders, loyalty points, push notifications, cart recovery messages, easy returns, and better product details.

These techniques help bring users back to the app and encourage repeat purchases.

6. Key Insights

- Website visitors increased from 2,100 to 2,950.
- Revenue increased from ₹1,20,000 to ₹1,90,000.
- Average session duration increased from 5.9 minutes to 7.1 minutes.
- Bounce rate decreased from 42% to 33%.
- Purchases increased from 240 to 380.
- The biggest funnel drop-off is between product views and add-to-cart.

7. Recommendations

- Improve product images and descriptions.

- Add clear size guides.
- Use wishlist reminders.
- Offer first-order discounts.
- Reduce checkout steps.
- Add multiple payment options.
- Use cart recovery notifications.
- Promote best-selling products.
- Improve return and refund experience.
- Track KPIs weekly.

8. Conclusion

Raritone's weekly performance shows positive growth in visitors, revenue, purchases, and session duration. The decreasing bounce rate is also a good sign. However, the engagement flow shows a major drop-off between product views and add-to-cart actions. By improving product pages, offers, checkout, and retention techniques, Raritone can increase conversions and customer loyalty.
